

RELEVANT EXPERIENCE

Self Employed – Contractor

2023 - Present

- Automating back of house workflows for local businesses
- Developed AI chat feature for iOS app
- Managing 4 engineers across 4 projects

TECHNOLOGIES: Javascript, Python, React Native, ElevenLabs, OpenAI Whisper API

Amazon – SDE II

2020 - 2023

- Led the design, build, and launch of front end apps for manager and candidate experiences to standardize internal transfer process, globally
- Worked with product team to develop roadmap
- Assisted and mentored SDEs overseeing backend APIs and DB
- Built accessible React component library
- Set up E2E testing and metrics dashboard
- Collaborated on designing and building of microservices architecture, enabling division of responsibilities and multiple team splits when project scaled

TECHNOLOGIES: React, Typescript, Jest, Cypress, Kotlin, AWS: API Gateway, Route53, Lambda, DynamoDB, CDK, Cloudwatch, Docker

Amazon – SDE I

2019 - 2020

- Within first two months of hire, rewrote and patched an internal permissions application
- Proposed new roadmap for internal permissions application, which was accepted and assigned to sibling team
- Managed sibling team in Hyderabad for two months to facilitate upgrade and handoff of the permissions application, reviewing all code, pair programming, and running team meetings
- Built new APIs as part of decade long migration plan to internal HR system
- Managed APIs vending data, including PII and highly confidential data for over 2MM employees to hundreds of internal applications globally

TECHNOLOGIES: React, Typescript, Ruby on Rails, Java, Dagger, AWS: Lambda, SQS, SNS, DynamoDB, ElasticSearch, Docker

Zippity — Software Developer

2018 - 2019

- One of two developers managing all company applications
- Launched 4 apps: Internal admin dashboard, Technician app, Customer app, and Kiosk app
- Migrated backend APIs from deprecated Google Datastore to Heroku Postgres
- Developed feature roadmap with C-suite

TECHNOLOGIES: React, Redux, Python, Flask, SQLAlchemy, Heroku: Postgres, AWS: EBS, EC2

Embryo Options, Boston, MA — Development Contractor

2018 - Fall

- Set up new payment processor and built new payment workflow

TECHNOLOGIES: C#, ASP.NET Web Forms

The Academy Group — Systems Contractor

2018, Summer

- Built web portal for staff, teachers, students, and parents using Flask framework
- Setup Postgres DB and built Flask REST API, managed in AWS
- Oversaw contractors writing mobile apps

TECHNOLOGIES: React, Python, Flask, SQLAlchemy, Heroku: Postgres, AWS: EC2

Dissectables — Founder & Principal Investigator

2014 - 2018

- Led research in application of FFF printing in medical education
- Designed, built and maintained FFF printers
- Managed team of designers, engineers, and scientists

TECHNOLOGIES: C, Python, OpenSCAD, Teacup, Repetier, Slic3r, Pronterface, Octoprint, KiCad

McMaster-Carr — Support Technician

2015 - 2016

- Managed and maintained IoT network in Elmhurst shipping warehouse
- Configure and troubleshoot scanners, printers, conveyor belts, and any part of automated systems
- Managed user database and permissions on Mainframe

TECHNOLOGIES: Powershell, z/OS

Oberlin College 3D Printlab — 3D Printing Associate

2013 - 2014

- Led creation of printlab, serving student body and local community
- Taught CAD and prototyping classes

TECHNOLOGIES: C, Python, Perl, OpenSCAD, SolidWorks, Sketchup, Slic3r

EDUCATION

BA, Oberlin College 2008-2012

Major: Latin Language & Literature

Minor: Chemistry

Relevant coursework:

Principles of Comp Sci I(Java)

Principles of Comp Sci II(Java)

Developing Android Apps: Android

Fundamentals(Udacity)

SUMMARY OF TECHNOLOGIES USED

PROGRAMMING LANGUAGES

JavaScript, TypeScript, Python, Java, Kotlin, Ruby, C#, C, Perl

FRONTEND & MOBILE

React, React Native, Redux

BACKEND & FRAMEWORKS

Ruby on Rails, Flask, SQLAlchemy, Dagger, ASP.NET Web Forms

CLOUD & INFRASTRUCTURE

AWS: API Gateway, Lambda, DynamoDB, EC2, EBS, Route53, SQS, SNS, CloudWatch

GitHub: git, CI/CD, Actions, Workflows

AUTOMATED TESTING FRAMEWORKS

Jest, Cypress

JUnit, Mockito, Spek

3D PRINTING TOOLCHAIN

OpenSCAD, SolidWorks, SketchUp, KiCad

Slic3r, Pronterface, Repetier, OctoPrint, Teacup

DATABASES

Relational: Postgres
NoSQL: DynamoDB

CONTAINERIZATION

Docker

INFRASTRUCTURE AS CODE

AWS CDK, Github Actions
